Recommended system requirements:

CPU: Dual core, 2 GHz or faster

RAM: 1 GB

OS: Windows XP or later

Video: 128 MB, OpenGL 3.0 or higher

Screen resolution: 1920x1080

DESCRIPTION:

Astral Heroes is a Collectible Card Game that's simple to learn, exciting to play, and deep enough to challenge even the greatest strategists. It's the spiritual sequel to our older game, Astral Masters, which still enjoys a loyal following over ten years after its release!

Astral Heroes uses a truly fair Free-to-Play model that never hides the best content behind "pay walls". There's nothing in the game that you can't have for free, and you won't need to grind for months to build a competitive deck.

Why choose Astral Heroes?

- 3 different game modes:
 - Custom Decks: Construct and play a deck of your own personal design
 - Random Decks: Improvise a strategy on the fly with a deck of random cards
 - Draft Tournament: Draft the cards you need before your opponents snatch them!
- A deep library of well-balanced creatures and spells
- No "junk" – every card in the game can be powerful in the right hands
- A global Online League – match wits with players from all around the world
- Guilds – team up with other players to earn extra bonuses and access special cards
- Sophisticated and merciless AI opponents that will test your mettle
- A rich single-player campaign, available for free to every player
- Daily quests, unique missions, and global leaderboards
